

**DEPARTMENT OF INTERNATIONAL BUSINESS and
SCHOOL OF PUBLIC POLICY & PUBLIC ADMINISTRATION**

Course: IBUS 6202/PPPA 6077, IBUS 6297/PPPA 6085 Summer 2014

Course Title Privatization, Nationalization, and Public-Private Partnerships

Instructor: Robert Weiner, Professor of International Business, Public Policy &
Public Administration, and International Affairs
401A Fonger Hall, 2201 202.994.5981 rweiner@gwu.edu

Office Hours Thursday 4-5pm, and by appt.

Course Objectives:

- ◆ Developing perspectives for analyzing whether and how to privatize enterprises, and how to evaluate enterprise performance after privatization.
- ◆ Providing participants with tools to understand the implications of public-private partnerships.

Course Description:

These two courses (six credits) examine, in an integrated fashion, privatization and public-private partnerships, focusing on the policy process and whether the privatization and public-private partnerships improve the financial and operating performance of formerly state-owned enterprises. The courses analyze the rationale for privatization and supporting policies for reforms. The courses will examine examples/cases drawn from a variety of industries including banking, oil & gas, telecom, and electricity. They provide an understanding of privatization through three perspectives: (1) Management and corporation governance issues after privatization including the impact of privatization and competition on the capital formation, output pricing, and structural change of privatized firms; (2) Effect of privatization on government efficiency, and the effect of the introduction of competition on the public accountability including allocation, distribution, and stabilization; (3) Impact of privatization on consumers in terms of access, reliability, price, quality and distributional equity.

The courses include a one-week trip to the UK to examine the history of the privatization and competition policy over the past quarter century. This will include:

- Analyses of cases of privatization from different industries in UK
- Visits with academics, policy analysts, and business leaders to gain insight into current assessment of privatization as a policy in UK.
- Discussions with UK consulting firms that have been heavily involved in privatization initiatives.

Students will discuss the lessons learned from the UK and explore the implications of the UK experience for privatization and competition policies in other countries.

Course Format:

Because students have different learning and working styles, this course will utilize a variety of learning and teaching formats. We will use lectures, discussions, and case studies. There is a significant amount of reading, as well as a group working paper, and an individual integrative memo, so students are urged to plan their time accordingly.

Students are expected to attend all classes. If you are unable to attend class, please call or email the instructor; absences will affect your participation grade. Students missing class are responsible for retrieving notes and assignments from classmates.

Class participation means speaking in class; attendance is insufficient. This is especially important for case discussion and guest speakers.

Students are expected to deliver their work on time. If you expect your work will be late for personal reasons, please discuss ahead of time with the instructor.

Academic Honesty:

Students are responsible for familiarizing themselves with the University's policies on academic honesty and integrity. Using words written by others without proper citation, or passing off someone else's work as your own, constitutes academic dishonesty and will be subject to disciplinary action—beginning with failure of the course. Group members are individually and collectively responsible for ensuring academic integrity of group work.

If you have questions regarding the use of materials, please ask.

Work Requirements & Assessment:

IBUS 6202/PPPA 6077 (seminar here)

Exam	40%	Take-home (sent June 19; <u>return by midnight, June 26/27</u>)
Group proposal	40%	<u>Due June 5, 5pm. 5 pp. + attachments.</u> The proposal for the project should describe what you plan to do, including description of the issues, justification/motivation of why they are important, scope of analysis (what will you focus on and how you will go about it), information you will need, and how you plan to obtain it.
Participation	20%	See note above. Also, <u>ATTENDANCE JULY 24 MANDATORY</u>

IBUS 6297/PPPA 6085 (study abroad)

Group project	50%	<p>Students will use the materials from lectures, contacts with people and organizations in the UK, and other sources to do a research project on lessons learned from privatization and public-private partnerships in one or more countries, possibly including the U.S., in accordance to their preference. The student research project will:</p> <ol style="list-style-type: none">Identify outcomes predicted by privatization theory and policy analysis, e.g., firm financial performance, consumer prices and access, etc. Then examine outcomes that occurred (or did not occur) in a particular industry and country.Investigate what happened and compare this with expectations. What did not happen? Why not? Discuss explanations for findings.Identify consequences for future reform efforts.
---------------	-----	--

Group presentation & paper due last mtg, July 24

Reflection memo	30%	Individual memo reflecting on the course, including lessons learned from the UK and unresolved issues. Due 5pm July 17 The objective of the reflection memo is to put together the parts of the course in Washington and London, and assess the course's
-----------------	-----	--

effectiveness at providing the context and content for you to do so. These are personal reflections, not a group project, and should focus on what was important to you.

The memo should be about 5 pages (double spaced, 12-point type so I can actually read it) and address some of the following: What did you learn from the study program in London? What did you learn from fellow participants? What surprised you? Contrast what you learned in Washington to what you heard and found in London; that is, how does the theory you learned in Washington compare to the practice you learned about in London. Reinforcing? Contradictory? Confusing? What did you like and not like about the course? Which speakers were effective, which were not, and why? Redundancies? Inconsistencies? Suggestions for improving the course? Anything else you believe is important. Discuss why.

Participation 20% See note above. Also, **ATTENDANCE AT VISITS MANDATORY**
